Hosting Technical Overview

Hosting Overview

Wiredrive provides hosting on Isilon Systems, the leader in clustered storage. Isilon Systems clients include:

- ▶ NBC Sports
- ▶ Kodak EasyShare Gallery
- ▶ ABC
- ▶ Sony Pictures Imageworks
- ▶ Sports Illustrated
- ▶ myspace.com
- ▶ Paramount
- ▶ E! Networks
- ▶ Technicolor
- ▶ Rhythm & Hues
- ▶ Fotokem
- ▶ Zoic

URL <http://www.isilon.com/products/index.php?sub=iq&page=features>

Additionally, Wiredrive clients can opt to use 128 Bit SSL encryption. For example, Craig Murray Productions uses SSL encryption with Disney; mOcean and Buddha Jones uses Wiredrive for feature film trailers with major studios.

Our servers are in a secured data center with biometric access and armed security. They servers have high reliability, advanced data protection, and are self healing. Also, our servers are all behind firewalls, and run FreeBSD with only the necessary ports.

With state-of-the-art FlexProtect-AP (Advanced Data Protection), administrators can set data protection policies on the fly at the cluster, directory or file levels. These policies can be changed in real time based on data availability requirements, or individual project, group, or user's needs.

OneFS N+2 data protection and virtual hot spare features ensure data remains 100% available even in the unlikely event of multiple, simultaneous disk drive or node failures. With Isilon IQ, data is automatically protected across the entire cluster using all available resources. In the event of a drive or node failure, all data remains 100% available and is rebuilt to any free space throughout the cluster - capacity is not lost to designated "recovery drives," and failed 250GB drives can be rebuilt in as little as one hour. NBC used Isilon IQ as one of the storage solutions used to power its broadcast coverage of the XX Olympic Winter Games in Torino, Italy, February 10-26.

Additional security:

- ▶ All downloads are logged by user and IP
- ▶ All files and thumbnails require a login to be viewed - There is no way to deep link to the files without being logged in.
